Agri Pro Trailing Shoe
Low Emission Slurry Applicator

Agri Pro Trailing Shoe Machine Specification

- The Agri Pro Trailing Shoe provides soil engagement with an enhanced contour following
- Includes a 30-hole distributor, stone trap system and 40mm hose.
- The Agri Pro provides precise application and flotation system on hilly or uneven ground keeping downward force on the shoes and includes a self-levelling boom that adjust to the ground.
- The Agri Pro gives the operator the option of filing from directly behind the applicator into the tank and is complete with mounting brackets between the tank and applicator sufficiently mounting onto the tank via a linkage system.
- The use of slurry applicators is one of the biggest opportunities to capitalize on precision nutrient application to further increase the value of the nutrient dense slurry while reducing emissions.
- Low emission slurry spreading offers up to 60% reduction in nitrogen loss on farm.
