ABBEY MACHINERY
since 1947

Abbey Machinery Industrial

Machines Engineered for Heavy Duty Industrial Use

Uses include:

- Dust suppression
- Road washing
- Water transport
- Industrial/domestic waste management

Abbey Machinery, experts in engineering and manufacturing blend experience in manufacturing premium trouble-free robust machines with technology, innovation and sustainability to offer a range of ready for market industrial machine solutions.

The Abbey Machinery Industrial Tanker range is available in capacities from 4,700 litres to 27,000 litres in a range of 37 Slurry Tanker models: Standard, Recess Premium and Premium Plus, Tandem and Tridem models. Uses for these tanks can include: Dust suppression, road washing, water transport, industrial/ domestic waste management. Abbey tanks are ideal for use in quarries, construction sites and other civil engineering projects.

Abbey Machinery offer a range of machines with a variety of customizable optional extras to best fit the needs of the end user.

Opportunities for custom paint, galvanizing and branding ensure the machine fits seamlessly into an existing fleet.

Abbey machines use the latest Battioni pumps known for their high performance and reliability, deep chassis support, Multi-leaf sprung drawbar, collared dish ends, double trap pump protection systems, top quality axles, brand leading tyres including BKT and Alliance with a variety of fast filling and emptying options.

Features available in Dust Suppression Tanks:

- Multi-Leaf Sprung Drawbar
- Rain Gun
- Spinning Disc Brackets
- Flashing Lights
- Custom Mudflaps
- Custom Fill Points
- Extra Pressure Relief and Decompression Valves
